

ABSTRACT OF THE DISCLOSURE

5 A method for treating a liquid comprising water with a gas
comprising ozone comprises introducing the liquid to be treated into a
treatment vessel, introducing the gas to treat the liquid into the
treatment vessel and treating the liquid in the treatment vessel,
pressurizing the treatment vessel and, using the pressure in the
treatment vessel to dispense the treated liquid from the treatment
10 vessel through a filter. An apparatus for treating the liquid is also
disclosed.
